Principal topics are polynomial, rational, exponential, and logarithmic functions; systems of equations and inequalities; Binomial Theorem; trigonometric and inverse trigonometric functions, solving triangles; trigonometric identities and equations; DeMoivre's Theorem, polar coordinates, and vectors.

**Course Content:** Through this 4 contact hour course, chapters 1-9 will be covered.

**Prerequisites:** MATH 0800 (Intermediate Algebra) **OR** an appropriate score on the AUM Math Placement Test.

**Calculator:** According to AUM Department of Mathematics Calculator Policy, students are required to possess a graphing calculator. A Texas Instrument's TI-84 (TI-83 or TI-82) is recommended. Calculators are allowed on assignments/exams, but students are still required to show, step by step, all of the mathematical procedure for the solution. **Graphing calculators featuring a CAS (e.g. TI-89 or TI-92) are not allowed.**

**Electronic Devices:** Cell phones, computers, tablets, and other electronic devices (except approved calculators) should be set to emit no audible sound (including vibration and messaging) and put away during class.

A student is considered to be absent if they come in after attendance has been taken or leave early. **Students are solely responsible for catching up on material that they miss due to any absence.** You may earn up to 6 extra points for attendance.

**Assignments:** Problems from each textbook section will be assigned in class and should be completed before the next class period. However, textbook homework will not be collected nor graded. In addition, several short in-class quizzes will be given with or without advance notice. The average of the quiz grades will be counted as one test grade.
