**Subject:** Pre-Engineering Club Meeting

Hello Pre-Engineering majors,

The club will be having a meeting tomorrow on:  
**Friday September 12<sup>th</sup> at 1:30 to 3:00 (realistic time span)**  
**070GH (down the back staircase or elevator and to the right)**  
**There will be food and drinks.**

Since our first meeting, a member proposed a new project to add to our current two.  
Current Projects:

- Fixed wing to bio-inspired morphing wing aircraft.
- Camera and servo/stepper motor controlled Rubik's Cube solving machine.
- **Proposed:** scale motorized high capacity (high weight load capacity) double draw bridge.

In the meeting we will talk about the new project proposal, and start organizing our different projects.  
**There is no knowledge of engineering needed, and the club is open to any major** (bring other majors who seem interested if you want).

If you wish to participate in a current project or propose your own, come and take a look.

Thanks,

Viraj Patel
