

Comments: Very good instructor

Comments: VERY GOOD INSTRUCTOR, HE UNDERSTOOD THAT SOME OF US WERE HAVING DIFFICULTIES, SO HE WENT OUT OF HIS WAY TO HELP! VERY NICE!

Comments: I had heard that Dr Wang was an exceptional teacher and he has proved to be so. I really felt like he had a personal commitment to our success. I do not feel I would have done as well in this course taught by another instructor.

Comments: DR. WANG IS A REALLY GOOD PROF.

I WOULD LIKE TO TAKE HIS CLASS IN FUTURE !!

Comments: Chances are I will end up taking this class again. Good Teacher, but I am a somewhat slow learner in math.

Comments: I was able to understand Dr. Wang's teaching methods. He made Calculus much easier to understand and brought it down to a more generalized level.

Comments: I think Mr. Yi Wang is really a good teacher who is ready to help student anytime with his smiling face.

Comments: I believe he tries his level best to make the ~~unde~~ student understand. I regard him as a good teacher.

Comments: Definitely my favorite teacher—very caring, concerned, and approachable.

Comments: Good instructor. Always let us know that his door was open if he ever had any questions.

Comments: Good Teacher

Fall, 2004, FSU

Comments: I hate math but learned a lot from Dr. Wang.

Comments: Dr. Wang is a very helpful, caring and hard-working professor. He is very fair and helped me out tremendously in a course I really didn't want to take.

Comments: Internet resources really helped in this class.

Comments: I really think the way Dr. Wang is having the students work together on problems at the end of classes is very helpful. I know much of this class must be lecture but working on problems & being able to help each other really helps me.

Comments: Dr Wang made math interesting again, which every other professor I've had has been unable to do for years. Because of him, I actually want to finish my math degree - probably for the first time

Dont let the slower students dictate the pace of the course. It's the "average" student who should do that.

Spring, 2004, FSU

Comments: You are doing a Great Job!
Keep up the good!

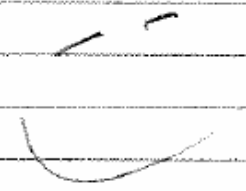

I enjoyed having you as a Professor.

Comments: I really liked Dr Wang's class. I feel that he has taught me a great deal in math, and I feel that he would've helped me at anytime if I needed it.

Comments: Seems to really enjoy what he is doing, wants his students to excel.

Comments: Good work Dr. Wang

Comments: Dr. Wang is very educated + knows all his stuff, I recommend him to anyone taking Math

Comments: Dr Wang used graphs, and they were useful

Comments: Dr. Wang is an exceptional instructor. He really helped me understand the methods used in trigonometry. He is always helping all of his students even during his lunch time. Dr. Wang is an asset to FSU.

Comments: Excellent teacher. Demonstrates extreme knowledge of subject matter.
Very positive
great at grading in a very fast manner.
uses webct a definite plus.

Comments: Overall good teacher

Comments: Very nice trying to keep the course simple to basics of understanding

Comments: Good teacher!

Fall, 2003, FSU

Comments: Mr Wang is an excellent teacher with extensive knowledge in this particular subject.

Comments: I appreciate Yi Wang's positive attitude towards teaching ⑤

Comments: I feel that Yi was a very good teacher. He really cared about all of us & wanted us to succeed.

Comments: Good class and great teacher. He was good to me in helping learn and in my field of study.

Comments: Mr. Wang, explains everything good, he just needs to slow down a little.

Comments: Yi Wang has an excellent rapport with his students in regards to the materials taught in the class as well as the progress of the individual student. The course material was difficult, as would be expected for this type of course, but took a personal initiative to work with the student's problems toward the material and assignment deadlines. Most teach expecting the class to follow or catch up, but Dr. Yi Wang remained flexible to this course and his syllabus to try to ensure that all the students were grasping the content of the course.

Comments: Dr Wang is a great professor. I really learned a lot from him and hope to take more courses with him in the future.

Comments: I thought the teacher did a great job in explaining the material covered.

Comments: Very good teacher, seems genuinely interested in helping student

Fall, 2002, WVU

The teacher was very good at using constructive criticism to improve his teaching methods. He really seemed to care if we did well. He also communicated well w/ the students through email so everyone knew what was going on.

Very good understanding of the class. very helpful

1 instructor. He was always very helpful and you could tell he really cared and wanted us to learn.

The class was very well taught + the syllabus was followed.
The teacher did a good job of contacting his students outside
of class with useful information about the course.

Overall, I enjoyed this class

he always was happy about being in class (which was cool because
it's an 8:30 class) and always was willing to do whatever he could
to help us

Yi did a great job, I thought the exams
were unfair, but that had nothing to do with
him. He always tried his hardest to prepare
us for the exams? was available anytime
we needed help, I would definitely recommend him
to another student.
I think the instructor did a very good job clarifying
the topics & he was always available and
more than willing to help outside class time.

Fall, 1999-Spring, 2001, NDSU

Yi Wang is excellent. Very pleased with his teaching skills. I would have definitely failed if it wasn't for him. He is great.

I liked that he went through as many problems as he could get through in the time allowed.

You are a great teacher, it was my lack of understanding that ruined C+?

Materials:

YI WANG is an excellent teacher, although he is hard to understand sometimes, he is very smart and able to answer questions efficiently.

Yi is very smart and nice.

We should have homework assigned so it helps us keep up in the course. Some of us, like myself, only do stuff when it needs to be done and if I knew homework was due it would inspire me to do it.

Yi Wang is a good guy.

Very smart. I would be doing better if I put in more time

materials: Yi Wang is a very good instructor of recitation
classes. If it weren't for him I would have

failed. Terrible. Yi is good!
BAD!

ONE OF THE BEST RECITATION INSTRUCTORS

I HAVE HAD,

materials: Yi Wang did a good job at being complete in
solving problems and explained every step
so it was easier to follow.

materials:

I have learned more in this math
class than any other I have ever
taken.

materials:

You are a much better teacher than the last time
I had you. Much more organized and
easier to follow.
